About Me

Graduate of the Information Technology program at G+SOŠ Rokycany, where I successfully completed my final exams in 2024. During my studies, I actively participated in numerous hackathons organized by SitPort and Aimtec. At the age of 17, I joined RTsoft as a part-time frontend developer working with TypeScript and React. In my final year, I took part in the Student Professional Activities (SOČ) competition, placing 1st at both the school and district levels, and 4th in the regional round. After graduation, I joined RTsoft full-time as a frontend developer, also representing the company at hackathons as a mentor and jury member. Over time, I took on responsibility for supervising interns focused on JavaScript development.

EDUCATION

ZŠ Jižní Předměstí
